

Worcester Oct. 26th 1878

Dear Mr. Tracy

Your card recd. When
the time comes I shall probably be
waddy to go to Providence.

Thanks for Oakes' list of
Luddon's names.

By the enclosed you will see that
Kortia is to be subject of basket! I
have written Hyatt, (for some years a
correspondent of mine), that he would give
much more by the reputation he would
make as the discoverer of the plant
by the same advertisement, it would give
him, than by such means as botanists
would be likely to pay, and that at
any rate a specimen ~~sent~~ ~~to~~ ~~me~~ ~~is~~
is considered as property ~~but~~ the due
of the person naming. But as he
is a cutter of simple and a dealer

therein I have considered that he
would not look upon the matter
in the same light as a botanist,
and have therefore told him that
some botanist might give him a
few small sums (a dollar or so) for
his specimens. I hope I have not
mistaken with you way of dealing
with him in any way (I decline
& purchase myself) ~~but~~; I was much
disgusted at first with the idea
that he should look upon me as a
thing in a spirit of trade, and es-
pecially that he should recall the the
circum sent to you. But I imagine
we have taken care of that! How
ever now you know every thing, that
I do not that is the reason I write
for you, this.

Worthington
J. M. McAuley
